DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, drawn to a method of forming a semiconductor device, classified in class 438, subclass 197.
- II. Claims 17-25, drawn to a semiconductor device, classified in class 257, subclass 288.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the device of claims 17-25 can be made by a materially different process from the method of claims 1-10 wherein a source region is formed in the substrate. The device of claims 17-25 can also be made by a materially different process from the method of claims 11-16 wherein instead of being implanted the impurities are diffused into the substrate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2815

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
